

SIDE EMITTING FIBER CABLE AND TRACK

NEW PRODUCT LINE as of 03/2014

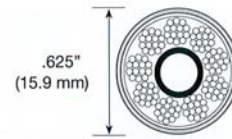

FC-42

FC-84

FC-126

SPECIFICATION FEATURES:

The side emitting fiber optic cable is constructed of .030"/.75mm diameter PMMA acrylic fibers of twisted sub bundles twisted within a flexible clear UV protected clear jacket. The fibers are twisted around a bright reflective PVC internal core that offers that flexible stability with maximum light output.

FC-42 = 42 fibers: .375" 9.5mm

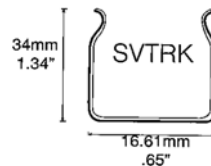

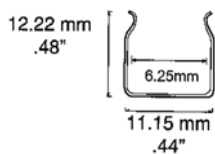

FC-84 = 84 fibers: .5" 12.7mm

FC-126= 126 fibers .625" 15.9mm

Suggested track: available in 6ft. clear U track sections:

FC-TRK-42 (3/8")

FC-TRK-126 (5/8")

Use with FC-42

Use with FC-84 or FC-126
